

# Jicable HVDC'16 Workshop Topic 5

## *HVDC Cable Systems*

*Søren Damsgaard Mikkelsen, Energinet.dk , Denmark*

*Workshop Jicable HVDC'16, Friday, August 26, 2016 - Paris - France*

## Topic 5: Converters: Technical coordination for the connection « cable / converters

### Key questions/issues:

- How well does the current recommendations for testing of DC cables take into account the over-voltages that can be generated by the present generation of multilevel VSC converters?
- No standard for GIS terminations for DC cables is available. This is a problem for offshore DC installations
